1. Each driver only has one driver license number, one tax number, and one contact number.
2. `contract_waste_type_frequency` illustrates the frequency of waste collection for a given contract and waste type.
3. Each truck only has one make and one model.
4. Each bin is only collected once every shift.
5. Each collection is only for the collection of one bin, and each bin can only be picked up during single collection.
6. The `coll_weight` and `coll_over_weight` attributes in the `COLLECTION` illustrates the weight of the waste collected and the amount of overweight.
7. Every driver can have multiple shifts, but each shift can only have one driver.
8. Each shift can only have one truck associated with it.
9. Each contract only covers one shift, and each shift can only belong to one contract.
