

T1-tsa-ra.docx

Student ID:33429472

Student Name:Ziqi Pei

Unit Code:FIT9132

Applied Class No:A12

Comments for your marker:

Write the **relational algebra operations** for each of Task 1 queries below (your answer must show an *understanding of query efficiency*).

List of symbols for copying/pasting as you enter your answers below:

project:  $\pi$ , select:  $\sigma$ , join:  $\bowtie$ , intersect:  $\cap$ , union:  $\cup$ , minus:  $-$

1(a)

$R = \pi_{\text{town\_id}, \text{town\_name}, \text{town\_state}} (\text{TOWN} - \pi_{\text{town\_id}, \text{town\_name}, \text{town\_state}} (\text{POI}))$

1(b)

$R = \pi_{\text{poi\_id}, \text{poi\_name}, \text{poi\_address}, \text{poi\_description}} (\sigma_{\text{poi\_type} = \text{'Nature and Wildlife' and poi\_review\_rating} > 3} (\text{POI}))$

1(c)

$R = \pi_{\text{member\_id}, \text{member\_given\_name}, \text{poi\_id}, \text{poi\_name}, \text{review\_date\_time}, \text{review\_rating}, \text{review\_comment}} (\sigma_{\text{town\_lat} = -17.9644 \text{ and town\_long} = 122.2304} (\text{TOWN} \bowtie (\text{REVIEW} \bowtie \text{POI}))))$
