A3- Rubric Summary (Weight: 40%)

Part	Marks	Criterion	Criterion	Criterion
Part A	5%	All the classes including boundary class and control class are identified correctly	Methods specified correctly with parameter types and return values and visibility modifiers	Code is developed based on the detailed class diagram (only applicable to the outlined features to be developed)
		All the classes are annotated with stereo types (Boundary/Control/Entity)	The data types and visibility modifiers of the attributes make complete sense	Java or Python coding conventions are followed in naming classes/attributes/methods
Part B	Code- 15%	Development and delivery of the outlined features is complete and correct.	Quality of UI, regarding user friendliness and design principles (Appropriate error messages are displayed for any exception and user introduced errors)	Quality of code, regarding object oriented design, readability and good programming practice
	Process - 5%	Code is optimised regarding code smells (no god class, no redudant code and no hard coded data values)	User can easily go back to the main menu whenever desired and with no impact to the data	Source code is properly documented with inline comments included where appropriate.
	Demo - 5%	Using Trello actively and effectively and Quality of the submitted report	Trello board logically organised, clear, and comprehensive with attention to details	Realistic card estimation and prioritisation in Trello according to the MoSCoW framework with relevant justifications
		Covering all the features in the demo clearly	Showing deep understanding by answering the questions	Well preparedness, time management
Part C	10%	Assignment 1 FeedbackFruit	A2 FeedbackFruit	A3 FeedbackFruit
